

OrangeLT™ | The Company, the Offering and the Results.

The Company | Proven Provider with Extensive Client List

Orange Legal Technologies is a leading provider of electronic discovery litigation, audit, and investigation services for law firms and corporations. Having served over 500 clients since inception and with over 100 clients leveraging the OneO® Discovery Platform since its introduction, Orange Legal Technologies has worked with some of the world's most well known corporations and law firms and has been recognized in leading analyst and media publications from such organizations as Gartner¹, IDC², The 451 Group³, and Forbes⁴ magazine.

The Offering | Professional Services and Advanced Technology

OrangeLT offers a complete suite of electronic discovery services, including collection, analysis, processing, review and production of digital and paper-based information. While providing expert staff to support knowledge intensive services ranging from forensic data collection to managed attorney review, OrangeLT supports core services with its proprietary and OneO® Discovery Platform. The OneO Discovery Platform is an advanced technology platform that provides clients integrated, web-accessible online analytics (early case/data assessment), processing and review of electronically stored information (ESI) from the security of a hosted centralized repository. OrangeLT's complete portfolio of litigation support offerings include:

Offering	Description
Forensics and Collections	Services that help you evaluate and acquire potentially relevant electronically stored information (ESI) for use in audits, investigations and litigation.
Analytics (ECA/EDA)	Services (Early Case Assessment/Data Assessment) that help you identify the scope of data sets early and eliminate irrelevant documents prior to complete attorney review.
Processing	Services that help you prepare responsive and relevant documents for subsequent use in follow-on electronic discovery tasks.
Review	Services that both provide the platform (OneO) and personnel (review attorneys) for you to conduct complete and defensible document reviews.
Production	Services that help you deliver or make available to another party documents and/or ESI deemed responsive to discovery requests.

While our background is proven and our capabilities complete, the most important benefit that our clients share with us about our services is that we allow them to conduct advanced electronic discovery while reducing their time, cost and risk. *Simply stated, we provide complete and completely affordable electronic discovery support that allows our clients to focus on the law, not the technology.*

OrangeLT™ | The Company, the Offering and the Results.

The Results | Decreased Time, Cost and Risk while Focusing on the Law

Providing complete and completely affordable electronic discovery support that allows our clients to focus on the law, not the technology, OrangeLT enables clients to collect, secure, review and manage electronically stored information in a defensible manner at a substantial time and cost savings when compared to traditional discovery approaches. This time and cost savings is the result of a combination of advanced technology and expert staff working together to provide you with either a complete eDiscovery capability from collection to production or to provide trusted augmentation to your current eDiscovery capability with selected services and expert support.

Benefits of engaging with OrangeLT include:

Efficiency

- Single vendor contact ensures streamlined management of eDiscovery execution and business (billing) administration resulting in time and cost savings.
- Advanced technology architecture (OneO) decreases platform development and maintenance costs resulting in lower costs for eDiscovery matters.
- Platform integration (OneO) at the application level decreases data transfer time and risks resulting in more efficient and more secure eDiscovery.

Expertise

- Defensible data forensics and collections capability with certified computer examiners.
- Direct and dedicated project management teams with 24x7x365 matter support.
- Licensed Attorney (U.S.) Review Managers to support OrangeLT on-shore and/or off-shore sourced review teams providing complete document review capability.

Infrastructure

- Software-as-a-Service (SaaS) delivery model for OneO provides secure, neutral and defensible data hosting without the requirement for client technology and infrastructure investment.
- Managed Review Staff provides clients licensed and trained attorneys without the requirement for managing the interview, evaluation, and hiring process for contract review attorneys.
- Dedicated research and development resources ensure continued development of client focused technology features and services providing clients investment protection for partnering with OrangeLT.
